## Two powerful solutions for your facility operations

Requirements for healthcare facilities like yours are constantly changing. New mandates by the CMS, Joint Commission, DNV GL, AAMI and AAAHC mean that you must be in compliance and can prove it.

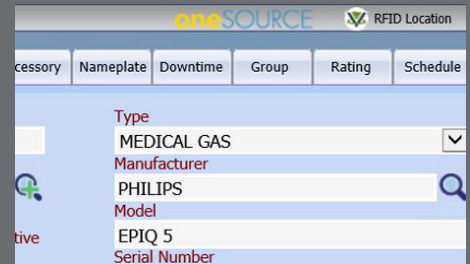

Integration of MaintenanceFirst's m1Encompass Facility Operations Management Solution and oneSOURCE Document Management Service helps your facility meet these changing requirements and stay in compliance with ease.

m1Encompass is the industry's only true Facility Operations Management Solution on the market, allowing you to easily and efficiently manage every aspect of your facility, including our flagship Asset and Work Order Management software.

oneSOURCE Document Management Service provides a facility access to the world's most complete online database service of manufacturers' validated Equipment IFU and PM recommendations. Completely online and continuously updated, oneSOURCE saves you time, space and money. No more bulky storage cabinets. No more costly staff-hours filing and updating documentation.

It's a natural fit. MaintenanceFirst and oneSOURCE provide the most robust and affordable tools to help ensure facility compliance. **Experience not only peace of mind, but substantial ROI.**

## Instant Accessibility

MaintenanceFirst's m1Encompass allows you to easily associate Equipment Manufacturers' IFU and PM Documentation available in oneSOURCE Document Management Service's Data Catalog directly with your m1Encompass Asset Equipment Data. Provide your technicians with instant access to the most up-to-date documentation from anywhere in the field, and on any device. No more guesswork of equipment performance parameters. No more guesswork of equipment disassembly, reassembly, or wiring schematics. And most importantly, no more guesswork if you are performing the proper corrective and preventative maintenance per compliance agency requirements.
